Rabat – Morocco

PROFESSIONAL SUMMARY

Cybersecurity Engineer specializing in **security audits, vulnerability assessment, and information systems hardening**. Proven track record across projects involving **network security, ISO 27001 compliance frameworks, and Python-based automation**. Seeking opportunities in **Information Systems Security Auditing, SOC Operations, and Governance**, or pursuing an **international Master's degree (M2) in Cybersecurity**.

EDUCATION

National School of Applied Sciences (ENSA) – Kénitra, Morocco *Sept. 2023 – July 2025*
Specialized University Master's Degree – Information Systems Security (M1/M2 Equivalent) Master's Degree

Faculty of Sciences and Techniques (FST) – Settat, Morocco *Sept. 2022 – Apr. 2023*
Professional Bachelor's Degree – Systems, Networks, and Security Engineering Bachelor's Degree

Specialized Institute of Applied Technology (ISTA NTIC) – Rabat, Morocco *Sept. 2020 – July 2022*
Specialized Technician Diploma – Software Development Associate Degree / DTS

Lycée des Sciences Expérimentales – Témara, Morocco *Sept. 2018 – June 2019*
International French Baccalaureate – Experimental Sciences High School Diploma

PROFESSIONAL EXPERIENCE

My BPO – Rabat, Morocco *June 2026 – Present*
L1 & L2 Telecom and Network Support Technician (Client: Paritel France)
- Delivered technical support and network troubleshooting for B2B clients of French telecommunications carrier **Paritel**.
- Diagnosed, investigated, and resolved escalated complex incidents across enterprise Telecom, IP, and Network architectures (Fiber, ADSL, VoIP, 4G/5G).
- Provided Tier-2 escalation assistance, guidance, and technical coaching to Level 1 service desk technicians.
- Managed end-to-end incident lifecycle and customer communication from initial ticketing to permanent resolution.

GesTop Services – Rabat, Morocco *Mar. 2025 – Oct. 2025*
Cybersecurity Analyst (Freelance / Capstone Project)
- Contributed to building a network reconnaissance and monitoring platform tailored for security audit engagements.
- Executed network mapping and port/service discovery scans to evaluate external and internal attack surfaces.
- Identified common vulnerabilities and contributed to structured audit reports with remediation steps.
- Mapped and visualized network topologies to enhance operational security visibility.

Independent Projects *Feb. 2024 – Mar. 2025*
Cybersecurity Analyst

- Conducted comprehensive security audits across network infrastructure, operating systems, and web applications.
- Performed threat modeling and vulnerability assessments, delivering prioritized remediation strategies.
- Automated repetitive security assessment tasks and baseline audits using custom Python and Bash scripts.
- Authored technical documentation, executive summaries, and formal security posture reports.

Independent Projects *Jan. 2022 – Feb. 2024*

Full-Stack Developer

- Engineered secure REST APIs and web services implementing robust authentication, RBAC, and comprehensive audit logging.
- Leveraged software engineering best practices to support operational security and defense-in-depth measures.

INTERNSHIPS

OPTIMATIC – Rabat, Morocco *Feb. 2023 – Sept. 2023*

Cybersecurity Intern

- Designed and hardened secure enterprise network architectures.
- Configured stateful firewalls, implemented VLAN segmentation, and executed security compliance audits.
- Supported alignment with ISO/IEC 27001 requirements and drafted formal technical security documentation.

S4U – Rabat, Morocco *Sept. 2022 – Jan. 2023*

Odoo ERP Developer Intern

- Developed custom business modules, configured database workflows, and administered Odoo instances.
- Analyzed functional business requirements to build tailored software integrations.

NETMAR – Rabat, Morocco *Feb. 2022 – July 2022*

Web Development Intern

- Developed interactive web and mobile applications interfaced with embedded systems (Raspberry Pi).
- Deployed and validated production software solutions within operational environments.

TECHNICAL SKILLS

- **Cybersecurity:** Security Audits, Vulnerability Assessment, ISO 27001, Firewalls, IDS/IPS, SIEM, SSL/TLS, Threat Analysis
- **Networks & Systems:** TCP/IP, DNS, DHCP, Network Segmentation, Monitoring, Fiber, ADSL, VoIP
- **Operating Systems:** Linux (Ubuntu, CentOS, Red Hat, Kali), Windows Server
- **Automation & Scripting:** Python, Bash
- **Software Development:** Django, Laravel, REST APIs, JavaScript, SQL
- **Tools & Platforms:** Git, Postman, Swagger, Jira, Confluence, Docker

CORE COMPETENCIES

Analytical Thinking
Complex Problem Solving
Client Relations & Technical Support
Team Collaboration & Leadership
Stress Tolerance & Prioritization

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- IBM & ISC2 – Cybersecurity Specialist Professional Certificate
- Cisco Ethical Hacker

- Cisco Python Essentials 1 & 2 – CCNA Academy
- Oracle Cloud Infrastructure 2024 – DevOps, Networking & Security
- Oracle Linux 8 Advanced System Administration
- Oracle Java SE 17 Developer & MySQL Administrator
- Google IT Support Professional Certificate

LANGUAGES

Arabic Native
French Fluent / Bilingual (C1 – Certified TCF)
English Professional Working Proficiency (B2)
