Rabat – Morocco

SUMMARY

Results-driven **Cybersecurity Engineer** specialized in **security auditing, vulnerability management, and infrastructure hardening**. Proven track record in **network security, ISO 27001 compliance, and workflow automation using Python**. Passionate about **SOC operations, GRC (Governance, Risk, and Compliance), and Offensive Security**, currently seeking international opportunities to leverage technical expertise in high-stakes environments.

EDUCATION

National School of Applied Sciences (ENSA) - Kenitra *Sept. 2023 – July 2025*
Master's Degree in Information Systems Security Rabat, Morocco

Faculty of Sciences and Technology (FST) - Settat *Sept. 2022 – July 2023*
Professional Bachelor's Degree in Systems, Networks, and Security Engineering Settat, Morocco

Specialized Institute of Applied Technology (ISTA NTIC) *Sept. 2020 – July 2022*
Advanced Technician Diploma in Software Development Rabat, Morocco

PROFESSIONAL INTERNSHIPS

GesTop Services *Mar. 2025 – Oct. 2025*
Cybersecurity Intern (Master's Thesis Project) Rabat, Morocco
- Developed a reconnaissance and network monitoring platform for security auditing purposes.
- Conducted comprehensive network scans (ports, services, active assets) and analyzed attack surfaces.
- Identified critical vulnerabilities and drafted detailed audit reports with remediation strategies.
- Mapped and visualized network infrastructure to enhance security visibility and incident response.

OPTIMATIC *Feb. 2023 – Sept. 2023*
Cybersecurity Intern Rabat, Morocco
- Designed and hardened secure network architectures for corporate clients.
- Configured firewalls, implemented network segmentation, and performed security health checks.
- Applied ISO 27001 standards and drafted Information Security Management System (ISMS) documentation.

S4U *Sept. 2022 – Jan. 2022*
Odoo Developer Intern Rabat, Morocco
- Developed, customized, and administered Odoo ERP modules.
- Performed business requirement analysis to implement tailored technical solutions.

WORK EXPERIENCE

Cybersecurity Analyst (Freelance/Independent) *Feb. 2024 – Mar. 2025*

- Led security audits across network, system, and application layers for various projects.
- Performed risk assessments, identified vulnerabilities, and provided technical remediation roadmaps.
- Automated security controls and routine checks using Python and Bash scripting.
- Produced high-quality technical reports and executive security summaries.

Full-Stack Developer (Independent) *Jan. 2022 – Feb. 2024*

- Developed secure APIs and web applications featuring robust authentication, RBAC, and logging.
- Leveraged software development skills to enhance operational security and tooling.

TECHNICAL SKILLS

- **Cybersecurity:** GRC, Vulnerability Assessment, ISO 27001, Firewalls, IDS/IPS, SIEM, SSL/TLS, Pentesting
- **Networking & Systems:** TCP/IP, DNS, DHCP, Network Segmentation, System Monitoring
- **Operating Systems:** Linux (Ubuntu, CentOS, RedHat), Windows Server
- **Automation:** Python, Bash, n8n
- **Development:** Django, Laravel, REST APIs, JavaScript
- **Tools:** Git, Postman, Swagger, Jira, Confluence, Nmap, SQLmap

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- IBM & ISC2 – Cybersecurity Specialist Professional Certificate
- Cisco Ethical Hacker
- Cisco Python Essentials 1 & 2 – CCNA Academy
- Oracle Cloud Infrastructure 2024 – DevOps, Networking & Security
- Oracle Linux 8 Advanced System Administration
- Oracle Java SE 17 Developer & MySQL Administrator
- Google IT Support Professional Certificate
